

Project Statement

Project Statement

Develop a World Cup 2026 Football Companion App using an interactive Streamlit platform that enables users to explore player profiles, analyze detailed statistics, and view performance predictions powered by advanced statistical and data-driven models.

The user will upload a CSV to carry on with the analysis. I have curated the data based on the needs of the project, and this is how it looks

Player_Name	Country	Club	Position	Age	WC_Appears	WC_Goals	WC_Assists	IsMVP	Height_cm	Weight_kg	Weight_lbs	Jersey_Number
Christian Pulisic	USA	AC Milan	F	27	2	2	0	No	183	74	163	10
Weston McKennie	USA	Juventus	M	27	2	0	0	No	183	77	170	5
Tyler Adams	USA	AFC Bournemouth	M	27	2	0	0	No	180	79	174	6
Folarin Balogun	USA	AS Monaco	F	28	0	0	0	No	182	78	172	9
Tim Weah	USA	Marseille	F	25	1	0	0	No	183	79	174	21
Antonee Robinson	USA	Fulham	D	25	2	0	0	No	183	72	159	12
Joe Scally	USA	Borussia Mönchengladbach	D	27	2	0	0	No	183	77	170	7
Gio Reyna	USA	Borussia Mönchengladbach	M/F	30	2	1	0	No	187	79	174	14
Sergiño Dest	USA	PSV Eindhoven	D/M	23	2	0	0	No	173	68	150	2
Brenden Aaronson	USA	Leeds United	M	23	2	0	0	No	178	73	161	13
Ricardo Pepi	USA	PSV Eindhoven	F	21	0	0	0	No	185	74	163	25
Malik Tillman	USA	Bayer Leverkusen	M	24	0	0	0	No	180	76	168	23
Haji Wright	USA	Coventry City	F	27	2	0	0	No	186	82	181	24
Alejandro Zendejas	USA	Club América	M/F	23	0	0	0	No	175	73	161	19
Tim Ream	USA	Charlotte FC	D	38	3	0	0	No	188	79	174	15
Miles Robinson	USA	FC Cincinnati	D	28	2	0	0	No	187	82	181	4
Chris Richards	USA	Crystal Palace	D	25	0	0	0	No	188	83	183	3
Mark McKenzie	USA	Toulouse	D	26	0	0	0	No	188	83	183	16
Auston Trusty	USA	Celtic	D	26	0	0	0	No	190	77	170	20
Alex Freeman	USA	Villarreal	D	27	0	0	0	No	183	82	181	11
Max Arfsten	USA	Columbus Crew	D	26	0	0	0	No	182	81	179	22

Refer to the project in GitHub for all the details

Initial Prompt

First Prompt:

Create a `World Cup Football Companion` app that does the following:

- The first tab will request the user to load the file. The screen must have a logo of the World Cup 2026 happening in the USA, along with different teams participating on the side showcased artistically.
- The second tab will allow the user to select any players from any country and get all the details about the players.
- The third tab will do a detailed analysis of the player and that country, and find out the top players of that country participating in that World Cup, and will perform a prediction about their performance for that World Cup.

Create a UV project and use Streamlit for the app.

First, brainstorm with me about the project structure, design, and how you plan to build it. Do not code unless I confirm.

Questions

Key Questions Asked by Claude Code Before Working on the Code Structure

1. Data Source:

- Do you have real player data, or should we create sample/mock data?
- How will prediction work? (Rule-based, ML model, statistical analysis?)

2. Features Priority:

- Is MVP status boolean or a more complex metric?
- Do you want to include injury data, recent form, etc.?

3. Visual Assets:

- Should we use real flag emojis or download flag images?
- Do you want player photos (if so, where from)?

4. Prediction Logic:

- Simple heuristic (squad strength + history)?
- Or more complex analysis?

5. Performance Predictions:

- Predict: Final placement? Goals? Knockout stage?

Answers:

Data is added to the Project for referenced.

Prediction is statistical analysis(search past records to do the analysis)

MVP is Boolean(Yes/No)

No need to add injury data and recent form

Use Flag emoji , show name of the country on hover

Add current player photos

Prediction is simple heuristic

Keep the final prediction till knockout stage

Subsequent Prompts

** Update README based on the current structure of the project

Second Prompt:

- Add Player avatar with Jersey number under third tab

Third Prompt:

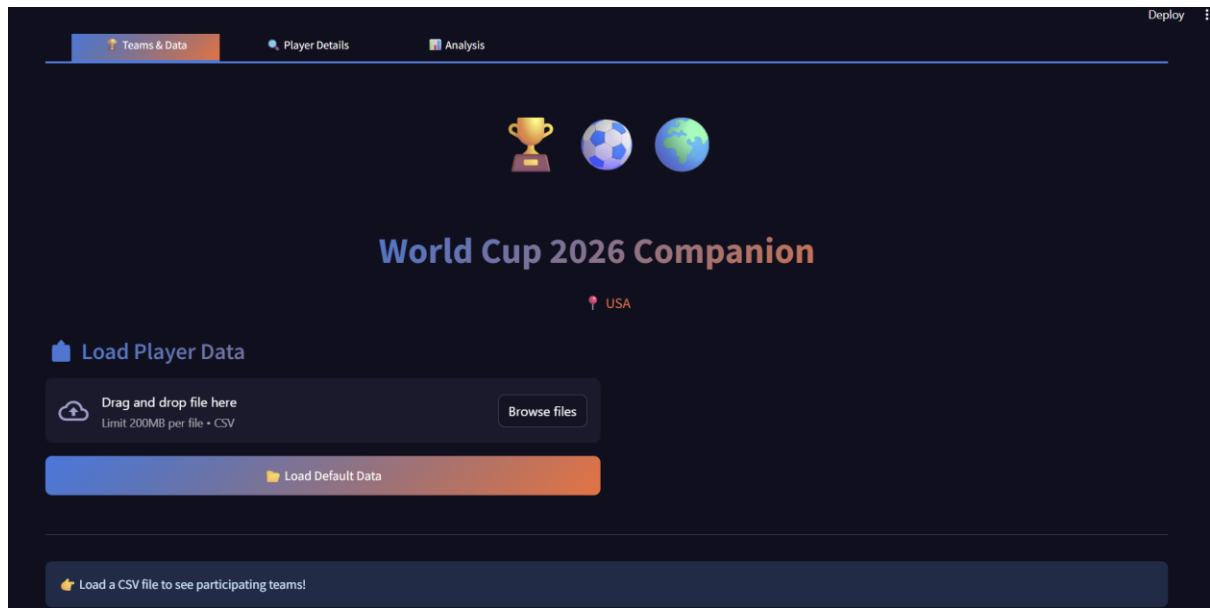

- Remove Jersey avatar and utilize the screen space efficiently

** Update README based on the current structure of the project.

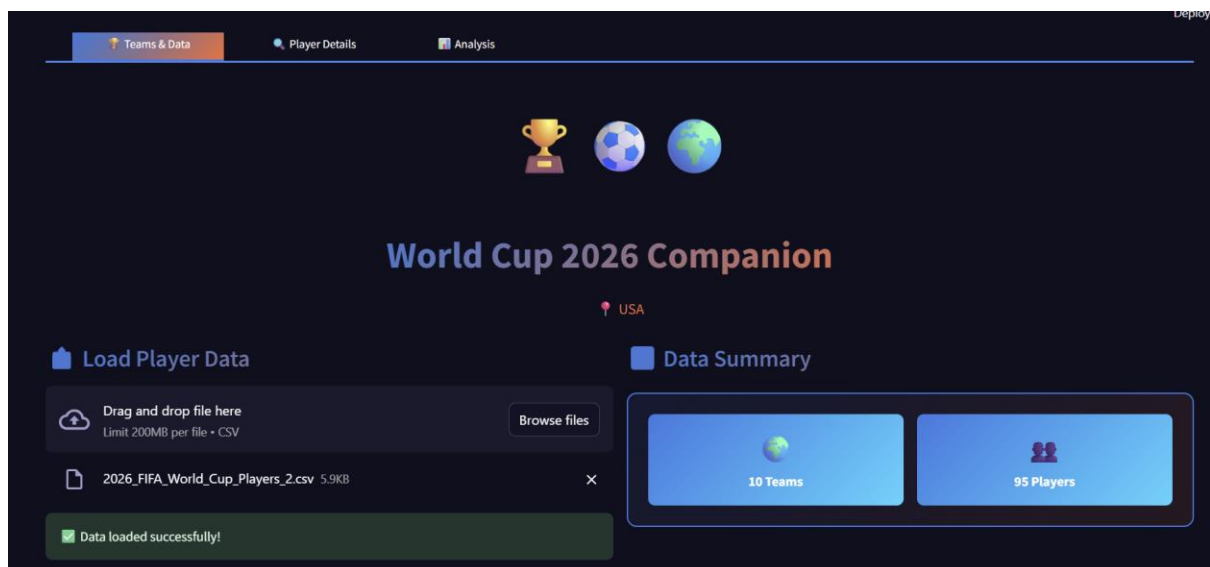

Screenshots

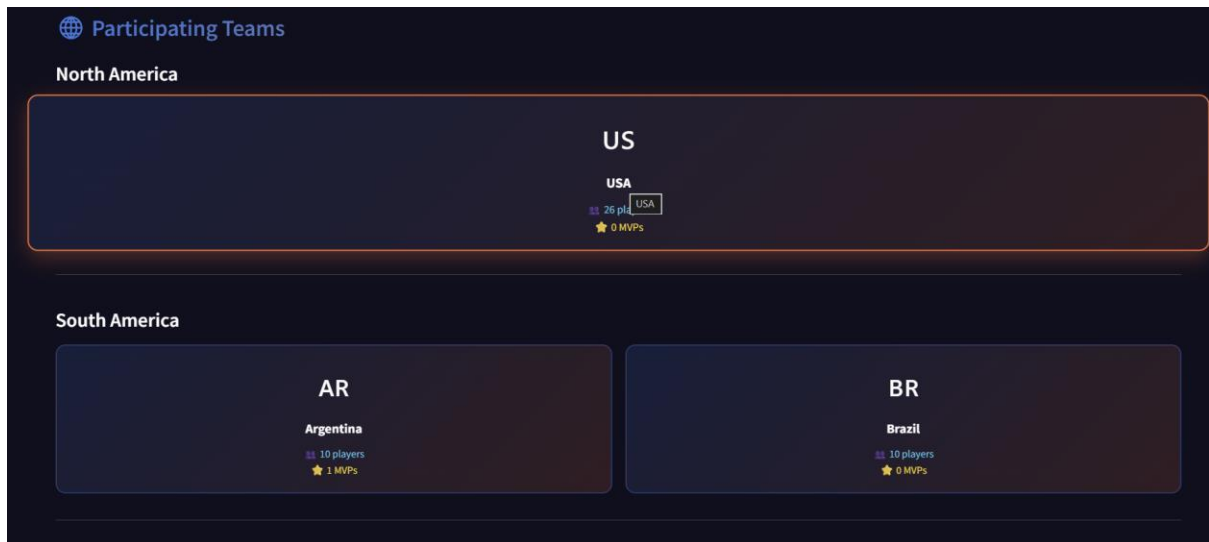

Once you launch the app

1st Screen

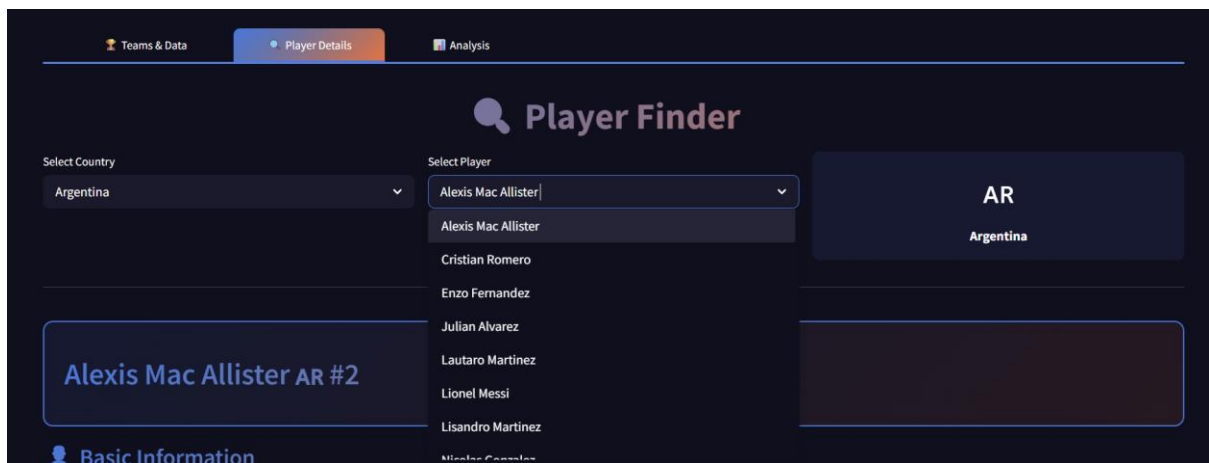

Now load the data

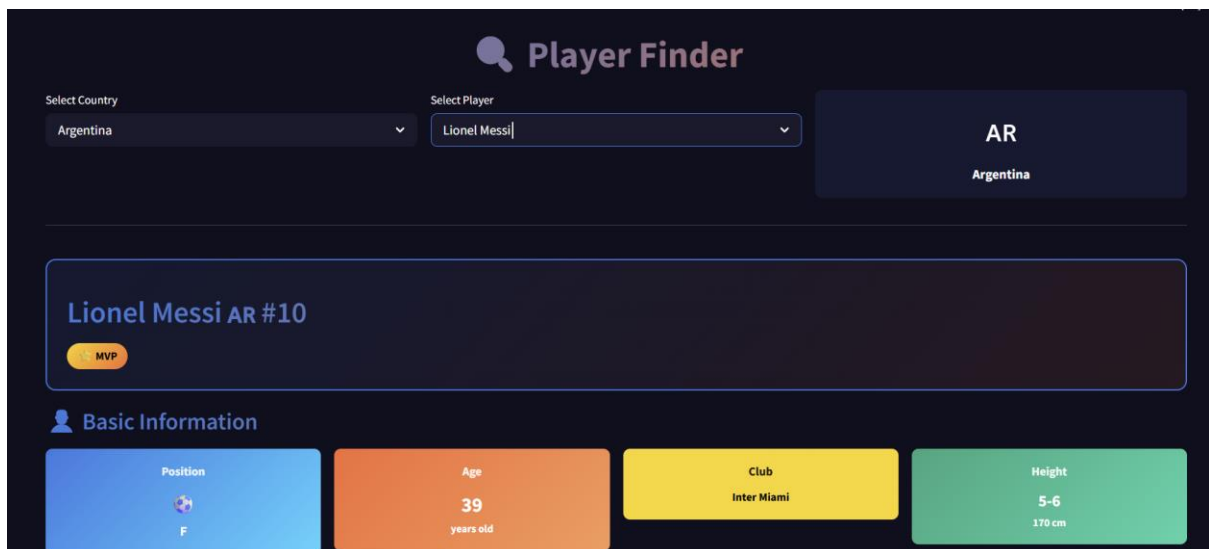

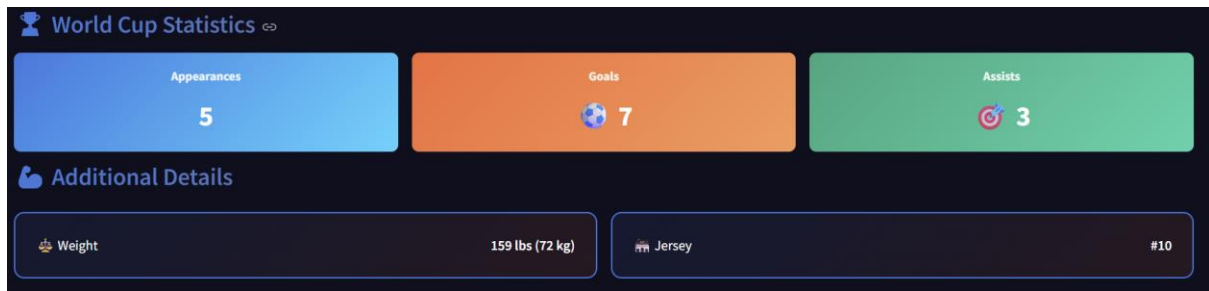

2nd Screen

Select any player and get details

3rd Screen

Country Analysis & Predictions

Select Country for Analysis

Argentina

Argentina

Brazil

England

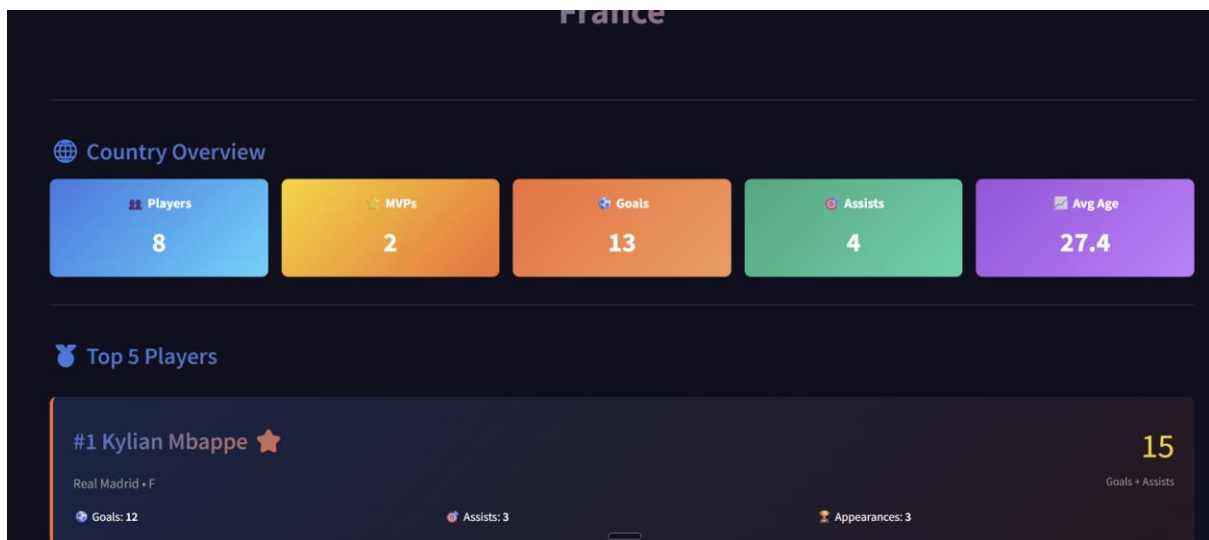

France

Germany

Netherlands

Norway

Get the detail analysis and prediction about any country(select it from the dropdown)

Tournament Prediction

2 Competitive Team

Likely to reach Quarterfinals or Semifinals

Confidence Level: High

Strength Score: 68.7/100

Detailed Analysis

Experienced Players

3

2+ WC appearances

Goalscorers

2

1+ WC goals

Playmakers

2

1+ WC assists
